

12th International Conference on Porous Media & Annual Meeting

May 25-28, 2020 – Qingdao, China
Satellite Short Courses on 24 & 29 May, 2020

Topics and Applications

- Transport phenomena
- Swelling and shrinking porous media
- Multiphysics-multiphase flow
- Reservoir engineering
- Soil mechanics and engineering
- Geothermal energy
- CO₂ sequestration
- Constitutive modeling
- Wave propagation
- Energy storage
- Biotechnology
- Biofilms
- Thin and nanoscale poromechanics
- Fuel cells and batteries
- Food
- Paper and textiles
- Filters, foams, membranes
- Fibers and composites
- Ceramics and constructions materials
- Other porous media applications

Venue and City

Qingdao International Conference Center (QICC) is located in the Olympic Sailing Center near the May 4th Square with its famous landmark sculpture *Wind of May*, a symbol of Qingdao city. QICC is at a favorable location by the sea and about an hour's drive from the new Qingdao airport which will begin operation in September 2019. Qingdao is best known for Tsingtao Beer and international festivals which promote friendship, economic & cultural exchanges between China and others all over the world.

Local Organizing Committee

School of Petroleum Engineering
China University of Petroleum (East China)

Jun Yao (Chair) · Yongfei Yang (Co-chair)
Lei Zhang · Shuaishi Fu · Zhaoqin Huang
Liang Gong · Hai Sun · Wendong Wang
Chuanjin Yao · Minglu Wu · Jianguang Zhang
Cunqi Jia · Geyun Zhang
